

Emergency Preparedness

Introductory Comments

Instructions:

Use this Safety Toolbox Talk to spark discussion within the employee group. Test knowledge retention with the associated quiz.

Preparing for emergencies is very important. Prepared is not Paranoid. Employer must know what should happen if or when a disaster or incident occurs. Preparing now sets your workplace up to ensure they are ready to handle the unexpected. An important first step is knowing the types of emergencies your workplace could face, and how to respond to them. www.nsc.org

Weather Emergency

- Know what weather emergencies are possible in your area
- Know where to go in each type of weather emergency
- Remain calm
- Be careful of debris in the aftermath

Fire Emergency

- Take fire drills seriously
- Know your closest exit routes and don't take elevators
- Leave your personal possessions behind
- Get out of the building as quickly as possible

Active Shooter

- If you can flee, do so immediately; leave belongings behind
- Find potential hiding places with cover and concealment; this will keep you hidden from the assailant and block bullets

- If you cannot flee, hide in an area where the shooter can't see you with the lights turned off and your phone silenced; if you are behind a door, lock it or block entry to it
- In close range situations, fighting increases your chance of survival; make use of improvised weapons (e.g. fire extinguishers, chairs, staplers, etc.)
- Call 911 as soon as you can do so safely
- To the best of your ability, be prepared to provide 911 and law enforcement with your location, the number of shooters, physical description of the shooter(s), the number and type of weapons used by the shooter(s) and the number of potential victims
- Follow law enforcement instructions; in the absence of other instructions keep your hands raised, visible and free of any objects

▶ Meeting Starter Questions

- Who is the most valuable asset?
- Where are your safety plans located?
- What is an Emergency Action Plan?

▶ Critical Safety Points

Additional Types of Emergencies:

- Chemical Exposures
- Electrical Hazards
- Terrorist Attacks
- Workplace Violence
- Bomb Threats
